From the desk of Michael Cheney

Dear Friend,

Hello, my name is Michael Cheney and I want to tell you a true story.
Picture the scene..

The monitor shone brightly in the room.

I sat back in my chair and let out a sigh of satisfaction and stared at the screen with a sense of great achievement at what I saw.

I couldn't quite believe it was all my own work.

And although it wasn't spectacular I had just created my very first website..

The year was 1995.

Back then I could never have dreamt that one day I would be invited to speak live on NBC television to an audience across Europe:

This is me talking live across Europe on NBC about one of my online businesses.

But I'm getting ahead of myself in the story here. Long before the TV, radio and press interviews and online successes **I spent thousands of hours honing my website marketing skills.**

The amazing thing is that when I started out way back in 1995 the Internet was still in the 'Dark Ages' - Yahoo! had just 200 websites listed on it!

It wasn't long until I realised that just building a website wasn't enough - it needed to be marketed properly so the right people could find it. So I started devouring every piece of information I could find on the subject of Internet marketing..

As my college friends were out enjoying life I was sitting in front of a computer learning the website marketing skills that would **literally change my life forever** just a few years later. But I wasn't quite ready to start out on my own..

I was so happy when I walked straight into a job after graduating and was **taken on by one of the largest companies in the world** - the oil giant ExxonMobil.

During my time there I picked up yet more useful lessons that would arm me for the battles that lay ahead. After working nine to five I would go home and work from 6pm to midnight and beyond honing my Internet marketing skills.

The biggest lesson I learned during my stint at an 'office job' was that working for someone else sucks!

"I decided enough was enough and after two years of working nine to five in the corporate world...I quit my job."

I started my own full-time Internet business.

Looking back this was **the best decision I ever made.**

People told me I was mad to leave a highly paid, secure job with one of the world's biggest corporations to set up my own Internet company.

But now I own several highly profitable online businesses and make more than I ever dreamed possible.

Now I work when I want, not when somebody tells me to.

I am my own boss.

A truly proud moment for me was when one of my online businesses **went head-to-head against a competitor that had \$20,000,000 funding. I took on this giant and won.**

The competitor went bust and that one particular website of mine became super-profitable and has gone on to pull in hundreds of thousands of visitors every year.

Think about it - why should you bother wasting your precious days trying to piece together the whole picture about website marketing when I can give you all the information you need right now?

The rest of your life is ahead of you!

You can either **choose to get a step-by-step proven blueprint for website success** and get back to enjoying life **OR** you can **continue wasting your time and your money scouring the web for answers day after day, week after week.**

I want to give you your life back!

The 3 Deadliest Mistakes Of Website Marketing

Mistake # 1. Getting Caught Up In The 'Traffic Game'

You do not want to fall into the trap of thinking that the route to making money on the Internet is just to get masses and masses of visitors or 'traffic' into your website.

If you are devoting too much time to attracting people to your website rather than spending time improving your website and focusing on how to convert your existing visitors into leads or sales you're heading down the wrong path.

In The Website Marketing Bible™ you will master proven methods to dramatically increase the retention and conversion rates of your website before you then uncover the tried and tested techniques of how best to market your website.

Mistake # 2. Expecting Overnight Success

Ever since the dawn of time man has been fascinated with the idea of the quick fix, the shortcut – a way to beat the system. And the website marketing arena is no different.

The bad news is that there a lot of hucksters out there trying their best to exploit this.

But the cold, hard fact of the matter is that you CAN'T beat the system. There is no miracle button to press.

But the great news, is that it doesn't matter if you can't beat the system - because you can LEARN IT!

Learning how the system works and how to 'play' the system is what The Website Marketing Bible™ is all about.

"How is it that some people become Olympic athletes, billionaires and world-class achievers and others stay at the bottom of the pile?"

THE REAL WINNERS ALL MODEL PEOPLE THAT HAD ALREADY ACHIEVED SUCCESS IN THEIR FIELD.

Think about it - 'modelling' is the only reason the human race advances at

all. Because we learn from others who know more than us.

Sure, you can try and piece together the entire Internet marketing jigsaw yourself - but why bother wasting your time when I can give you everything you need to know, right now?

Mistake # 3. "Build It And They Will Come"

The old classic. It would be closer to the truth to re-phrase it:

"Build it and they won't have a clue you exist until you arm yourself with the right information about how to market your website."

I know it's not as catchy, but it's the truth.

Just like the gold rushes of yesteryear – the creation of the Internet has led to hysteria and hyped up beliefs of 'wealth beyond your wildest dreams'. It is possible, but it isn't that simple!

Trying to master website marketing on your own is the equivalent of setting off to the gold rush without a map or a compass. You might get somewhere close to where the gold is by following the masses but you're definitely not going to strike it big time.

However, if you follow a tried and tested blueprint that shows you exactly where to go, what to do and how to do it and you stick to your side of the bargain following the step-by-step guide, your success is assured.

David Rahman, SLifeCoaching.com

"Hi Michael,

I'm still working my way through, but enjoyed every minute so far!

I'm halfway the Bible now, and it really is fun reading and found it very inspirational. I've been implementing some of your ideas to my site already (couldn't wait) and hope to continue doing so whenever something new strikes me.

Sometimes I just stop reading and look at my website, and work a bit around the idea I just read. It's fun!

What got *me* to buy your book, was your strategy to be "a friend of the house" through your ongoing e-mails, video lessons, *without* invading and being pushy. You share good stuff, in a relaxed, simple way, and along the lines you add "if you're interested, I have something good to sell".

Along the way, being "a new friend of the house" you became a welcome friend of the family, and at that point you gained respect and trust. That, a reasonable price and of course knowing you have excellent knowledge (the book couldn't be bad), did the trick for me.

Kind regards,

David De Groot, MyReproductions"

"I have to let you know that **the Website Marketing Bible was one of the best marketing / website books I have ever read.** It was so good that as soon as I finished reading the books, I had a new business idea and began creating a new website for it.

I looked at internet marketing in a totally different way and website marketing became much clearer to me.

I am so pleased that I purchased your book. It may sound unusual to hear this but for me the greatest benefit is that it has helped me to take my business ideas to a completely new level. I am sure you will see my website soon and you will be mightily impressed with my (yours) website marketing methods.

The investment to your book was worth every penny.

Once again, thank you and for me the benefit is much greater than just improving my website marketing techniques."

James Boon, Red Hot Properties Overseas

"The ebook really is the bible when it comes to make a successful website. **I highly recommend this ebook. This should in fact be the first ebook you buy, before you start any online business.** The reason that I say this is that after reading this ebook, I'm forced to make a lot of big changes to my existing websites. Buy this ebook!!

The thing many webmasters do wrong with their websites, is that they start marketing a site that will not make any sales in the first place. You should first focus on how to make your site a successful selling machine. Then you can begin the marketing process.

This is what you will learn in this ebook.

You will learn four essentials that you need to get right in order to earn money from your website. This information is covered in detail in four chapters. Throughout the ebook, you will be given exercises to work through that will help you capture and internalize what you learn as you go along. The exercises really help you to understand how to implement the information in this ebook into your own website.

Next, you will learn how to announce your website on the Internet. You are guided in what you should do and often more importantly, what you should not do.

You can read this ebook from cover to cover the

first time. Then simply refer to it every time you want to change something on your site or when you start a new site. But it's always important that you really need to apply what you have learned. Just reading the ebook and not using that information, won't make your website any better.

As a webmaster I know that doing things right the first time, without going through a lot of trial and errors, will save you a lot of time and money. So even though this ebook is priced at \$97 it will save you money buying it. I've made all the errors that one could ever make, when it comes to making a website. And I hate to think of all the money I used on all kinds of ebooks and websites in the hunt for online success. **So take my word for it. This ebook will save you money!"**

Torgeir Sunnarvik, Every Pleasures

"Just had to write and say how fantastic the Marketing Bible is. **I downloaded it this afternoon and have just finished reading - my kids only got beans on toast tonight and I had to get my husband to take my daughter to swimming, but I wouldn't be moved! Even on a Friday night!** (but still have a glass of wine in hand!)

I've realised loads of things but probably the one that really struck a chord with me about my

whole attitude to my site, you know, site designed, job done! It's a real waste of time if you just leave it there to gather dust. I've got to start using it as a marketing tool and stop using my excuse of 'Oh, you don't really get any of my type of business from web sites' Having said that, there's loads of work to be done and I've got to get on and do it.... that's the hard part. But I feel as though I can make a start now as you have demystified a lot of processes for me.

I'm proof that the stepping stone approach to permission marketing really works. I signed up for your videos and thought they were great. Not only did you give such genuine and useful info you spoke to me direct and with such enthusiasm and knowledge - I really felt I got to know you through them and feel I know you even more now I've read your book! I signed up for the bible as soon as I finished the videos and that's not something I normally do! And I wasn't disappointed with my investment! Even before I had signed up for the bible I'd already emailed several people in my network to tell them about the free videos - guess what I'll be doing next!

I'll be reading through it all again on Monday and putting my Action Plan together. I feel genuinely excited about doing this.

Once again, Michael, thanks for such a brilliant and inspirational read."
